Tulip Planting

Fall bulbs should be planted in well prepared beds. If the soil is heavy, the addition of some sand and bonemeal will help the growth and bloom ability of the bulbs.

In planting tulips it is recommended that bulbs be planted in groups instead of single lines. Groups of 6 to 12 tulips of one variety are very effective. A large bed is best planted in triangular wedges of 25 to 100 bulbs each, arranged so that they make a continuous pattern.
